RAILROAD COMMISSION OF TEXAS
OFFICE OF GENERAL COUNSEL

OIL AND GAS DOCKET IN THE MCCOOK, SE. (VICKSBURG 14300) NO. 04-0227721 AND MCCOOK, SE. (VICKSBURG 15500) FIELDS, HIDALGO COUNTY, TEXAS

FINAL ORDER
APPROVING THE APPLICATION OF COASTAL OIL & GAS CORPORATION FOR NEW FIELD DESIGNATIONS AND ADOPTION OF FIELD RULES FOR THE MCCOOK, SE. (VICKSBURG 14300) AND MCCOOK, SE. (VICKSBURG 15500) FIELDS HIDALGO COUNTY, TEXAS

The Commission finds that after statutory notice in the above-numbered docket heard on March 28, 2001, the presiding examiner has made and filed a report and recommendation containing findings of fact and conclusions of law, for which service was not required; that the proposed application is in compliance with all statutory requirements; and that this proceeding was duly submitted to the Railroad Commission of Texas at conference held in its offices in Austin, Texas.

The Commission, after review and due consideration of the examiner's report and recommendation, the findings of fact and conclusions of law contained therein, hereby adopts as its own the findings of fact and conclusions of law contained therein, and incorporates said findings of fact and conclusions of law as if fully set out and separately stated herein.

Therefore, it is ORDERED by the Railroad Commission of Texas that the application of Coastal Oil & Gas Corporation for New Field Designations to be known as the McCook, SE. (Vicksburg 14300) Field (No. 59083 800), and McCook, SE. (Vicksburg 15500) Field (No. 59083 810), Hidalgo County, Texas, be and it is hereby approved.

It is further ORDERED by the Railroad Commission of Texas that the following field rules be and are hereby adopted for the McCook, SE. (Vicksburg 14300) Field and McCook, SE. (Vicksburg 15500) Field.

RULE 1:
A. The entire correlative interval from 14,278 feet to 15,152 feet as shown on the Gamma Ray log of the Coastal Oil & Gas Corporation Winding Brook Lease Well No. 1, E.B. Pue #208 Survey, Hidalgo County, Texas, shall be designated as a single reservoir for proration purposes and be designated as the McCook, SE. (Vicksburg 14300) Field.

B. The entire correlative interval from 15,505 feet to 16,234 feet as shown on the Gamma Ray log of the Coastal Oil & Gas Corporation Winding Brook Lease Well No. 1, E.B. Pue #208 Survey, Hidalgo County, Texas, shall be designated as a single reservoir for proration purposes and be designated as the McCook, SE. (Vicksburg 15500) Field.
RULE 2: No well for gas shall hereafter be drilled nearer than FOUR HUNDRED SIXTY-SEVEN (467) feet to any property line, lease line, or subdivision line and no well shall be drilled nearer than NINE HUNDRED THIRTY-THREE (933) feet to any applied for, permitted or completed well in the same reservoir on the same lease, pooled unit or unitized tract. The aforementioned distances in the above rule are minimum distances to allow an operator flexibility in locating a well, and the above spacing rule and the other rules to follow are for the purpose of permitting only one well to each drilling and proration unit in either field. Provided however, that the Commission will grant exceptions to permit drilling within shorter distances and drilling more wells than herein prescribed whenever the Commission shall have determined that such exceptions are necessary either to prevent waste or to prevent the confiscation of property. When exception to these rules is desired, application therefor shall be filed and will be acted upon in accordance with the provisions of Commission Statewide Rules 37 and 38, which applicable provisions of said rules are incorporated herein by reference. The standard drilling unit shall remain forty (40) acres per well.

In applying this rule, the general order of the Commission with relation to the subdivision of property shall be observed.

RULE 3: The daily allowable production of gas from individual wells completed in a non-associated gas reservoir of the subject fields shall be determined by allocating the allowable production, after deductions have been made for wells which are incapable of producing their gas allowables, among the individual wells in the following manner:

FIVE percent (5%) of each field's total allowable shall be allocated equally among all the individual proratable wells producing from that field.

NINETY-FIVE percent (95%) of each field's total allowable shall be allocated among the individual wells in the proportion that the deliverability of such well, as evidenced by the most recent G-10 test filed with the Railroad Commission bears to the summation of the deliverability of all proratable wells producing from that field.

Done this twenty-fourth day of April, 2001.

RAILROAD COMMISSION OF TEXAS

Chairman Michael L. Williams
Commissioner Charles R. Matthews
Commissioner Tony Garza
