RAILROAD COMMISSION OF TEXAS  
OFFICE OF GENERAL COUNSEL

OIL AND GAS DOCKET  
NO. 04-0228817  

IN THE BOB WEST, S. (L 7-12) AND (L 13-20) FIELDS, STARR COUNTY, TEXAS

FINAL ORDER  
APPROVING THE APPLICATION OF  
EL PASO PRODUCTION OIL & GAS COMPANY  
FOR NEW FIELD DESIGNATIONS AND ADOPTION OF FIELD RULES  
FOR THE BOB WEST, S. (L 7-12) AND (L 13-20) FIELDS  
STARR COUNTY, TEXAS

The Commission finds that after statutory notice in the above-numbered docket heard on August 1, 2001, the presiding examiner has made and filed a report and recommendation containing findings of fact and conclusions of law, for which service was not required; that the proposed application is in compliance with all statutory requirements; and that this proceeding was duly submitted to the Railroad Commission of Texas at conference held in its offices in Austin, Texas.

The Commission, after review and due consideration of the examiner's report and recommendation, the findings of fact and conclusions of law contained therein, hereby adopts as its own the findings of fact and conclusions of law contained therein, and incorporates said findings of fact and conclusions of law as if fully set out and separately stated herein.

Therefore, it is ORDERED by the Railroad Commission of Texas that the application of El Paso Production Oil & Gas Company for two New Field Designations to be known as the Bob West, S. (L 7-12) Field (No. 10044 400) and Bob West, S. (L 13-20) Field (No. 10044 450), Starr County, Texas, be and they are hereby approved.

It is further ORDERED by the Railroad Commission of Texas that the following field Rules be and are hereby adopted for the Bob West, S. (L 7-12) and Bob West, S. (L 13-20) Fields.

RULE 1:

(a): The entire correlative interval from 11,150 feet to 12,570 feet (true vertical depth) as shown on the Gamma Ray log of the Coastal Oil & Gas Corporation (now El Paso Production Oil & Gas Company) Luera State Gas Unit "A" Lease Well No. 5, Juan De Dios Garcia Survey, Starr County, Texas, shall be designated as a single reservoir for proration purposes and be designated as the Bob West, S. (L 7-12) Field.

(b): The entire correlative interval from 12,600 feet to 13,410 feet (true vertical depth) as shown on the Gamma Ray log of the Coastal Oil & Gas Corporation (now El Paso Production Oil & Gas Company) Luera State Gas Unit "A" Lease Well No. 5, Juan De Dios Garcia Survey, Starr County, Texas, shall be designated as a single reservoir for proration purposes and be designated as the Bob West, S. (L 13-20) Field.

RULE 2: No well for gas shall hereafter be drilled nearer than FOUR HUNDRED SIXTY-SEVEN (467) feet to any property line, lease line, or subdivision line and no well shall be drilled nearer than NINE HUNDRED THIRTY-THREE (933) feet to any applied for, permitted or completed well
in the same reservoir on the same lease, pooled unit or unitized tract. The aforementioned distances in the above rule are minimum distances to allow an operator flexibility in locating a well, and the above spacing rule and the other rules to follow are for the purpose of permitting only one well to each drilling and proration unit. Provided however, that the Commission will grant exceptions to permit drilling within shorter distances and drilling more wells than herein prescribed whenever the Commission shall have determined that such exceptions are necessary either to prevent waste or to prevent the confiscation of property. When exception to these rules is desired, application therefor shall be filed and will be acted upon in accordance with the provisions of Commission Statewide Rules 37 and 38, which applicable provisions of said rules are incorporated herein by reference. The standard drilling unit shall remain FORTY (40) acres per well.

In applying this rule, the general order of the Commission with relation to the subdivision of property shall be observed.

RULE 3: The daily allowable production of gas from individual wells completed in a non-associated gas reservoir of each of the subject fields shall be determined by allocating the allowable production, after deductions have been made for wells which are incapable of producing their gas allowables, among the individual wells in each field in the following manner:

FIVE percent (5%) of the total allowable for each field shall be allocated equally among all the individual proratable wells producing from that field.

NINETY-FIVE percent (95%) of the total allowable for each field shall be allocated among the individual wells in the proportion that the deliverability of such well, as evidenced by the most recent G-10 test filed with the Railroad Commission bears to the summation of the deliverability of all proratable wells producing from that field.

Done this twenty-first day of August, 2001.

RAILROAD COMMISSION OF TEXAS

Chairman Michael L. Williams

Commissioner Charles R. Matthews

Commissioner Tony Garza
