RAILROAD COMMISSION OF TEXAS
OFFICE OF GENERAL COUNSEL

OIL AND GAS DOCKET  IN THE PITTSBURG (PALUXY H₂S
NO. 06-0262611  DISPOSAL) FIELD, CAMP COUNTY,
TEXAS

FINAL ORDER
APPROVING THE APPLICATION OF ENBRIDGE PIPELINES (NE TEXAS) LP
FOR INJECTION OF FLUIDS CONTAINING HYDROGEN SULFIDE
IN ITS PITTSBURG GAS INJECTION LEASE WELL NO. 1
PITTSBURG (PALUXY H₂S DISPOSAL) FIELD
CAMP COUNTY, TEXAS

The Commission finds that after statutory notice in the above-numbered docket
heard on October 2, 2009, the presiding examiner has made and filed a report and
recommendation containing findings of fact and conclusions of law, for which service was
not required; that the proposed application is in compliance with all statutory requirements;
and that this proceeding was duly submitted to the Railroad Commission of Texas at
conference held in its offices in Austin, Texas.

The Commission, after review and due consideration of the examiner's report and
recommendation, the findings of fact and conclusions of law contained therein, hereby
adopts as its own the findings of fact and conclusions of law contained therein, and
incorporates said findings of fact and conclusions of law as if fully set out and separately
stated herein.

Therefore, it is ORDERED by the Railroad Commission of Texas that a new field
designation known as the Pittsburg (Paluxy H₂S Disposal) Field, Camp County, Texas,
(Field No. 71765150) is hereby approved for the Pittsburg Gas Injection Lease Well No.
1.

It is further ORDERED by the Railroad Commission of Texas that Enbridge Pipelines
(NE Texas) LP is hereby authorized to dispose of fluids containing hydrogen sulfide into its
Pittsburg Gas Injection Lease Well No. 1, Pittsburg (Paluxy H₂S Disposal) Field, Camp
County, Texas, pursuant to Statewide Rule 36(c)(10)(A).

It is further ORDERED by the Railroad Commission of Texas that Enbridge Pipelines
(NE Texas) LP is hereby authorized to conduct disposal operations in the Pittsburg Gas
Injection Lease Well No. 1, Pittsburg (Paluxy H₂S Disposal) Field, Camp County, Texas,
subject to the following terms and conditions:

SPECIAL CONDITIONS:

1. Waste shall only be injected into strata in the subsurface depth interval from 5,700
feet to 6,300 feet.
2. The injection volume shall not exceed 2,145 barrels (4,000 MCF) of acid gas per day.

3. The maximum operating surface injection pressure shall not exceed 2,850 psig.

4. Before injection operations can begin, Enbridge Gas Pipelines (NE Texas) LP must have an approved contingency plan.

STANDARD CONDITIONS:

1. Injection must be through tubing set on a packer. The packer must be set no higher than 100 feet above the top of the permitted interval.

2. The District Office must be notified 48 hours prior to:
   a. running tubing and setting packer;
   b. beginning any workover or remedial operation;
   c. conducting any required pressure tests or surveys.

3. The wellhead must be equipped with a pressure observation valve on the tubing and for each annulus.

4. Prior to beginning injection, and subsequently after any workover, an annulus pressure test must be performed. The test pressure must equal the maximum authorized injection pressure or 500 psig, whichever is less, but must be at least 200 psig. The test must be performed and the results submitted in accordance with the instructions of Form H-5.

5. The injection pressure and injection volume must be monitored at least monthly and reported annually on Form H-10 to the Commission's Austin Office.

6. Within 30 days after completion, conversion to disposal, or any workover which results in a change in well completion, a new Form W-2 or G-1 must be filed in duplicate with the District Office to show the current completion status of the well. The date of the disposal well permit and the permit number must be included on the new Form W-2 or G-1.

7. Written notice of intent to transfer the permit to another operator must be submitted to the Commission at least 15 days prior to the date the transfer will occur by filing Form P-4.

8. This permit will expire when the Form W-3, Plugging Record, is filed with the Commission.
9. That the well be identified and operated according to Permit Number 13008.

Provided further that, should it be determined that such injection fluid is not confined to the approved strata, then the permission given herein is suspended and disposal operation must be stopped until the fluid migration from such strata is eliminated. The special permit conditions may be modified after notice and opportunity for hearing to prevent migration of injection fluid from the approved strata.

Done this 22\textsuperscript{nd} day of October, 2009.

RAILROAD COMMISSION OF TEXAS

(Order approved and signatures affixed by OGC Unprotested Master Order dated October 22, 2009)
