

**RAILROAD COMMISSION OF TEXAS  
OFFICE OF GENERAL COUNSEL**

**OIL AND GAS DOCKET  
NO. 05-0273211**

**IN THE SAVELL (BOSSIER SAND)  
FIELD, ROBERTSON COUNTY, TEXAS**

**FINAL ORDER  
ADOPTING FIELD RULES FOR THE  
SAVELL (BOSSIER SAND) FIELD  
ROBERTSON COUNTY, TEXAS**

The Commission finds that after statutory notice in the above-numbered docket heard on December 09, 2011, the presiding examiner has made and filed a report and recommendation containing findings of fact and conclusions of law, for which service was not required; that the proposed application is in compliance with all statutory requirements; and that this proceeding was duly submitted to the Railroad Commission of Texas at conference held in its offices in Austin, Texas.

The Commission, after review and due consideration of the examiner's report and recommendation, the findings of fact and conclusions of law contained therein, hereby adopts as its own the findings of fact and conclusions of law contained therein, and incorporates said findings of fact and conclusions of law as if fully set out and separately stated herein.

Therefore, it is ordered by the Railroad Commission of Texas that the following field rules are hereby adopted for the Savell (Bossier Sand) Field, Robertson County, Texas:

**RULE 1:** The entire correlative interval between 12,570 feet and 14,949 feet, as shown on the log of the Marathon Oil Company, George Savell Lease, Well No. 2 (API No. 395-30489), Francis Slauter Survey, A-335, Robertson County, shall be designated as a single reservoir for proration purposes and be designated as the Savell (Bossier Sand) Field.

**RULE 2:** The daily allowable production of gas from individual wells completed in the subject field shall be determined by allocating the allowable production, after deductions have been made for wells which are incapable of producing their gas allowables, among the individual wells in the following manner:

FIVE percent (5%) of the field's total allowable shall be allocated equally among all the individual prorable wells producing from the field.

NINETY-FIVE percent (95%) of the field's total allowable shall be allocated among the individual wells in the proportion that the deliverability of such well, as evidenced by the most recent G-10 test filed with the Railroad Commission bears to the summation of the deliverability of all prorable wells producing from the field.

It is further ordered that the allocation formula in the Savell (Bossier Sand) Field will remain suspended. The allocation formula may be reinstated administratively, in accordance with the Commission's rules, if the market demand for gas in the Savell (Bossier Sand) Field drops below 100% of deliverability.

Done this 10<sup>th</sup> day of January, 2012.
