

**RAILROAD COMMISSION OF TEXAS
HEARINGS DIVISION**

**OIL AND GAS DOCKET
NO. 8A-0289255**

**IN THE ADCOCK, W. (SPRABERRY)
FIELD, DAWSON COUNTY, TEXAS**

ORDER NUNC PRO TUNC

**ADOPTING FIELD RULES
FOR THE ADCOCK, W. (SPRABERRY) FIELD,
DAWSON COUNTY, TEXAS**

In conference at its office in Austin, Texas, the Railroad Commission of Texas took up for consideration its Final Order entered on August 12, 2014, the matter adopting field rules for the Adcock, W. (Spraberry) Field, Dawson County, Texas. The Commission finds that the Final Order entered August 12, 2014, Rule 3, incorrectly stated the unassigned acreage value as EIGHTY (80) acres, when it should have been ONE HUNDRED SIXTY (160) acres.

Accordingly, it is **ORDERED** that the Final Order in Docket No. 8A-0289255 be, and the same is hereby, amended *nunc pro tunc* to correct the unassigned acreage value in Rule 3 to be ONE HUNDRED SIXTY (160) acres. The field rules for the Adcock, W. (Spraberry) Field are hereby presented in their entirety:

Therefore, it is **ORDERED** by the Railroad Commission of Texas that the application of Raw Oil & Gas, Inc., to adopt field rules for the Adcock, W. (Spraberry) Field (ID No. 00706 500) in Dawson County, Texas, is hereby approved. The field rules for the Adcock, W. (Spraberry) Field are presented in their entirety below:

RULE 1: The entire correlative interval between 6,910 feet to 8,000 feet as indicated on the array compensated true resistivity type log of the Raw Oil & Gas Darrel Lease Well No. 1 (API No. 42-115-33520), Section 4, Block 2, J Poitevent Survey, A-769, Dawson County, Texas, shall be designated as a single reservoir for proration purposes and be designated as the Adcock, W. (Spraberry) Field.

RULE 2: No well for oil or gas shall hereafter be drilled nearer than THREE HUNDRED THIRTY (330) feet to any property line, lease line, or subdivision line. There is no minimum between well spacing limitation. The aforementioned distances in the above rule are minimum distances to allow an operator flexibility in locating a well; and the above spacing rule and the other rules to follow are for the purpose of permitting only one well to each drilling and proration unit. Provided however, that the Commission will grant exceptions to permit drilling within shorter distances and drilling more wells than herein prescribed, whenever the Commission shall have determined that such exceptions are necessary either to prevent waste or to prevent the confiscation of property. When exception to these rules is desired, application therefor shall be filed and will be acted upon

in accordance with the provisions of Commission Statewide Rules 37 and 38, which applicable provisions of said rules are incorporated herein by reference.

In applying this rule, the general order of the Commission with relation to the subdivision of property shall be observed.

RULE 3: The acreage assigned to the individual oil well for the purpose of allocating allowable oil production thereto shall be known as a proration unit. The standard drilling and proration units are established hereby to be ONE HUNDRED SIXTY (160) acres. No proration unit shall consist of more than ONE HUNDRED SIXTY (160) acres except as hereinafter provided. All proration units shall consist of continuous and contiguous acreage which can reasonably be considered to be productive of oil. No double assignment of acreage will be accepted. If after the drilling of the last well on any lease and the assignment of acreage to each well thereon in accordance with the regulations of the Commission there remains an additional unassigned acreage of less than ONE HUNDRED SIXTY (160) acres, then and in such event the remaining unassigned acreage up to and including a total of FORTY (40) acres may be assigned as tolerance acreage to the last well drilled on such lease or may be distributed among any group of wells located thereon, so long as the proration units resulting from the inclusion of such additional acreage meet the limitations prescribed by the Commission.

An operator, at his option, shall be permitted to form optional drilling units of FORTY (40) acres. A proportional acreage allowable credit will be given for a well on a fractional proration unit.

For the determination of acreage credit in this field, operators shall file for each well in this field a Form P-15 Statement of Productivity of Acreage Assigned to Proration Units. On that form or an attachment thereto, the operator shall list the number of acres that are being assigned to each well on the lease or unit for proration purposes. For wells, operators shall be required to file, along with Form P-15, a plat of the lease, unit or property; provided that such plat shall not be required to show individual proration units. There is no maximum diagonal limitation in this field.

RULE 4: The maximum daily oil allowable for each well on an ONE HUNDRED SIXTY (160) acre unit in the subject field shall be based on the Discovery Allowable of 270 barrels of oil per day and, at expiration of the Discovery Allowable shall be based on the 1965 Yardstick Allowable of , and the actual allowable for an individual well shall be determined by the sum total of the two following values:

- a. Each well shall be assigned an allowable equal to the top allowable established for a well having a proration unit containing the maximum acreage authorized exclusive of tolerance acreage multiplied by TEN percent (10%) and by then multiplying this value by a fraction, the numerator of which is the acreage assigned to the well and the denominator of which is the maximum acreage authorized for a proration unit exclusive of tolerance acreage.

- b. Each well shall be assigned an allowable equal to NINETY percent (90%) of the maximum daily oil allowable above.

Done this 16th day of September, 2014.
