The Commission finds that after statutory notice in the above-numbered docket heard on May 15, 2015, the presiding examiners have made and filed a report and recommendation containing findings of fact and conclusions of law, for which service was not required; that the proposed application is in compliance with all statutory requirements; and that this proceeding was duly submitted to the Railroad Commission of Texas at conference held in its offices in Austin, Texas.

The Commission, after review and due consideration of the examiners’ report and recommendation, the findings of fact and conclusions of law contained therein, hereby adopts as its own the findings of fact and conclusions of law contained therein, and incorporates said findings of fact and conclusions of law as if fully set out and separately stated herein.

Therefore, it is ORDERED by the Railroad Commission of Texas that the application of Sandalwood Exploration, LP for a new field designation for the Norman Hurd (Wilcox 2) Field, Tyler County, Texas, be and hereby is approved.

It is further ORDERED that the following Temporary Field Rules shall be adopted for the Norman Hurd (Wilcox 2) Field, Tyler County, Texas:

**RULE 1:** The entire correlative interval from 7,810 feet MD to 7,862 feet MD as shown on the Baker Hughes High Definition Induction Log of the BP A-22 Lease, Well No. 2 (API No. 42-457-30866), Tyler County, Texas, shall be designated as a single reservoir for proration purposes and be designated as the Norman Hurd (Wilcox 2) Field.

**RULE 2:** No oil well shall hereafter be drilled nearer than TWO HUNDRED (200) feet to any property line, lease line, or subdivision line and no well shall be drilled nearer than FOUR HUNDRED (400) feet to any applied for, permitted or completed well in the same reservoir on the same lease, pooled unit or unitized tract. The aforementioned distances in the above rule are minimum distances to allow an operator flexibility in locating a well and the above spacing rule and the other rules to follow are for the purpose of permitting only one well to each drilling and proration unit in the field. Provided however, that the Commission will grant exceptions to permit drilling within shorter distances and
drilling more wells than herein prescribed whenever the Commission shall have determined that such exceptions are necessary either to prevent waste or to prevent the confiscation of property. When exception to these rules is desired, application therefore shall be filed and will be acted upon in accordance with the provisions of Commission Statewide Rules 37 and 38, which applicable provisions of said rules are incorporated herein by reference.

In applying this rule, the general order of the Commission with relation to the subdivision of property shall be observed.

RULE 3: The acreage assigned to an individual oil well for the purpose of allocating allowable production thereto shall be known as a proration unit. The standard drilling and proration units are established hereby to be FORTY (40) acres. No proration unit shall consist of more than FORTY (40) acres. All proration units shall consist of continuous and contiguous acreage which can reasonably be considered to be productive of oil. No double assignment of acreage will be allowed.

For the determination of acreage credit in this field, operators shall file for each well in this field a Form P-15 Statement of Productivity of Acreage Assigned to Proration Units. On that form or an attachment thereto, the operator shall list the number of acres that are being assigned to each well on the lease or unit for proration purposes. For each well, operators shall be required to file, along with the Form P-15, a plat of the lease, unit or property; provided that such plat shall not be required to show individual proration units. There is no maximum diagonal limitation in this field.

RULE 4: The maximum daily oil allowable for each well in the subject field shall be a MER allowable of 400 barrels of oil per day.

It is further ORDERED that all overproduction for the BP A-22 Lease, Well No.2 is hereby cancelled.

It is further ORDERED that these rules are temporary and effective until November 15, 2016, or until Commission staff evaluates appropriate data after notice and opportunity for hearing as offered by the Commission prior to the expiration of the rules. After this notice and opportunity for hearing, should the evidence evaluated during review be insufficient to sustain spacing or proration unit rules, these temporary rules, on the Commission's own motion, will be terminated and the field will revert to Statewide spacing and density rules.

Done this 14th day of July, 2015.

RAILROAD COMMISSION OF TEXAS

(Order approved and signatures affixed by Hearings Division Unprotested Master Order dated July 14, 2015)
