### Amend §3.86 and other rules re: UFT fields

Amend §3.86 and other rules re: UFT fields

I applaud the RRC for the proposed rule change of requiring a Texas Registered Professional Land Surveyor to sign horizontal well plats. The RRC has long required tying well locations to the nearest survey and lease lines but without the requirement for those survey and lease lines to be determined by a surveyor. This change will go far in protecting the property interests of mineral and surface owners.

I also respectfully request that the ability for an engineer to sign these plats be deleted. Again, determination of boundary lines is the purview of the surveyor - not the engineer.

Thank you for your consideration of my comments.
