### Amend §3.86 and other rules re: UFT fields

Amend §3.86 and other rules re: UFT fields

I would like to echo the thoughts of my peers in regards to the seal and signature of boundary surveys; often referred to as well plats, unit plats, as-built plats, etc. The surveying and mapping required to produce legal documents during the course of these energy projects falls under the duties of the land surveyor. Many of the notations and measurements provided on the required documents for energy projects are in reference to boundary and survey lines, or require duties that should only be performed under the direct supervision of a registered professional land surveyor. Let's keep engineers engineering and surveyors land surveying.

Thank you,

Greg Cavataio
