Amend §3.86 and other rules re: UFT fields

Amend §3.86 and other rules re: UFT fields

I am writing in support of the proposed rule changes and would encourage the RRC to consider applying stricter rules to all well plats to protect the interests of individual property owners as well as the State of Texas' interests. However, as land surveying and civil engineering have diverged into to distinct disciplines and continued to become more technologically complex and specialized over the past several decades, I believe that most persons licensed as Civil Engineers under Section 1001.001 are not sufficiently trained to make the determinations necessary to fulfill the intent of the new rules. I would encourage the commission to remove the portion of the rule allowing plats to be prepared by civil engineers.
