RAILROAD COMMISSION OF TEXAS  
HEARINGS DIVISION  

OIL AND GAS DOCKET: IN THE NORMAN HURD (WILCOX 1)  
NO. 03-0304114 FIELD, TYLER COUNTY, TEXAS  

FINAL ORDER  
APPROVING THE APPLICATION OF  
SANDALWOOD EXPLORATION, LP  
FOR A NEW FIELD DESIGNATION AND ADOPTING  
TEMPORARY FIELD RULES FOR THE  
NORMAN HURD (WILCOX 1) FIELD,  
TYLER COUNTY, TEXAS  

The Commission finds that after statutory notice of the application made by Sandalwood Exploration, L.P. (Operator No. 747194) in the above-numbered docket heard on May 12, 2017, the presiding Technical Examiner and Administrative Law Judge (collectively, “Examiners”) have made and filed a report and recommendation containing findings of fact and conclusions of law, for which service was not required; that the proposed application is in compliance with all statutory requirements; and that this proceeding was duly submitted to the Railroad Commission of Texas at conference held in its offices in Austin, Texas.  

The Commission, after review and due consideration of the Examiners' report and recommendation, the findings of fact and conclusions of law contained therein, hereby adopts as its own the findings of fact and conclusions of law contained therein, and incorporates said findings of fact and conclusions of law as if fully set out and separately stated herein.  

Therefore, it is ORDERED by the Railroad Commission of Texas that the application of Sandalwood Exploration, L.P. for a new field designation for the Norman Hurd (Wilcox 1) Field (ID No. 65983500), Tyler County, Texas, be and hereby is approved.  

It is further ORDERED that the following Temporary Field Rules shall be adopted for the Norman Hurd (Wilcox 1) Field, Tyler County, Texas:  

RULE 1: The entire correlative interval from 7,752 feet MD to 7,780 feet MD as shown on the Baker Hughes High Definition Induction Log of the BP A-22 Lease, Well No. 2 (API No. 42-457-30866), Tyler County, Texas, shall be designated as a single reservoir for proration purposes and be designated as the Norman Hurd (Wilcox 1) Field.  

RULE 2: No oil well shall hereafter be drilled nearer than TWO HUNDRED (200) feet to any property line, lease line, or subdivision line and no well shall be drilled nearer than FOUR HUNDRED (400) feet to any applied for, permitted or completed well in the
same reservoir on the same lease, pooled unit or unitized tract. The aforementioned
distances in the above rule are minimum distances to allow an operator flexibility in
locating a well and the above spacing rule and the other rules to follow are for the
purpose of permitting only one well to each drilling and proration unit in the field.
Provided however, that the Commission will grant exceptions to permit drilling within
shorter distances and drilling more wells than herein prescribed whenever the
Commission shall have determined that such exceptions are necessary either to
prevent waste or to prevent the confiscation of property. When exception to these rules
is desired, application therefore shall be filed and will be acted upon in accordance with
the provisions of Commission Statewide Rules 37 and 38, which applicable provisions
of said rules are incorporated herein by reference.

In applying this rule, the general order of the Commission with relation to the
subdivision of property shall be observed.

RULE 3: The acreage assigned to an individual oil well for the purpose of
allocating allowable production thereto shall be known as a proration unit. The standard
drilling and proration units are established hereby to be FORTY (40) acres. No
proration unit shall consist of more than FORTY (40) acres. All proration units shall
consist of continuous and contiguous acreage which can reasonably be considered to
be productive of oil. No double assignment of acreage will be allowed.

For the determination of acreage credit in this field, operators shall file for each
well in this field a Form P-16 Data Sheet, Acreage Designation. On that form or an
attachment thereto, the operator shall list the number of acres that are being assigned
to each well on the lease or unit for proration purposes. For each well, operators shall
be required to file, along with the Form P-16, a plat of the lease, unit or property;
provided that such plat shall not be required to show individual proration units. There is
no maximum diagonal limitation in this field.

It is further ORDERED that these rules are temporary and effective until
December 27, 2018, or until Commission staff evaluates appropriate data after notice
and opportunity for hearing as offered by the Commission prior to the expiration of
the rules. After this notice and opportunity for hearing, should the evidence evaluated
during review be insufficient to sustain spacing or proration unit rules, these temporary
rules, on the Commission's own motion, will be terminated and the field will revert to
Statewide spacing and density rules.

Done this 1st day of August, 2017.

RAILROAD COMMISSION OF TEXAS

(Order approved and signatures affixed by
Hearings Divisions’ Unprotested Master
Order dated August 1, 2017)
